Mohansh Technologies

Sailpoint

Course Duration - 45 Days

Sailpoint Training is intended for Sailpoint users who want to enhance their careers by increasing the visibility of their technical competence. Our tutors will walk you through the steps of designing and building your own infrastructure from the ground up. You will receive hands-on experience and be ready to tackle any implementation projects that come your way. We provide actual experience through real-world projects and use cases in addition to Sailpoint Online training.

This SailPoint IdentityIQ training is intended to boost your employment prospects in the Identity Management field by teaching you how to use the industry standard technology, SailPoint IdentityIQ.

The three primary components of our Sailpoint IdentityIQ Implementation & Developer training programme, which was specifically designed to prepare you for a variety of SailPoint duties, are implementation, administration, and development.
